SUMMARY

Frontend Developer with over 4 years of experience building and maintaining web applications across frontend, backend, and API layers. Skilled in developing responsive user interfaces, backend services, REST API integrations, shared TypeScript functionality, and third-party integrations using JavaScript, TypeScript, AngularJS, Node.js, and LoopBack.

Experienced in source-control and AI platform integrations, application reliability, authorization workflows, data synchronization, concurrency handling, and automated testing. Proven ability to troubleshoot complex technical issues and deliver maintainable, high-quality software through unit, API, integration, contract, UI, and end-to-end testing.

PROFESSIONAL EXPERIENCE

Frontend Developer | Backend and API Development 07/2022 – Present
Toro Cloud Philippines Clark Pampanga, Philippines

- Developed and maintained **full-stack web application features** using **JavaScript, TypeScript, AngularJS, Node.js, LoopBack, REST APIs**, and **shared TypeScript packages**.
- Built **responsive interfaces** from **UI/UX designs and technical requirements**, including **editors, navigation, configuration tools, modals**, and **resource-management workflows**.
- Developed **backend controllers, services, repositories, and middleware** supporting **authentication, source control, deployment**, and **external system integrations**.
- Integrated and maintained **API workflows** with **GitHub, GitLab, Bitbucket, OpenAI, GitHub Copilot**, and other **third-party services**.
- Improved **system reliability** by addressing **authorization, synchronization, concurrency, data consistency, branch management, deployment**, and **external-service issues**.
- Implemented features involving **source-control workflows, AI platform integrations, application data synchronization**, and **asynchronous backend processes**.
- Developed automated **unit, API, integration, contract, UI**, and **end-to-end tests** using **Jest, Mocha, Cypress**, and **Playwright**.
- Expanded and modernized **end-to-end test coverage** while improving **code maintainability** through **debugging, refactoring, dependency upgrades**, and **regression testing**.
- Collaborated with **engineers and cross-functional teams** on **technical discussions, feature implementation, troubleshooting, performance optimization**, and **product improvements**.
